PROFESSIONAL SUMMARY

Data Analyst with a B.Tech in Electronics and Communication Engineering (Graduated 2024) and hands-on experience in data analytics through internships and projects. Proficient in SQL, Python, Excel, Google Workspace, Power BI, and Tableau to clean, analyze, and visualize data for actionable insights. Strong analytical, problem-solving, and communication skills with a passion for learning and collaborating in data-driven environments.

EDUCATION

Bachelor of Technology (B.Tech) in Electronics and Communication Engineering Rajagiri School of Engineering and Technology, Ernakulam, Kerala	CGPA: 7.22/10 2020 – 2024
---	-------------------------------------

WORK EXPERIENCE

DATA SCIENCE INTERN – (Remote) Techolas Technologies Pvt Ltd, Calicut, Kerala	October 2025 - Present
- Utilized SQL, Python, and MS Excel to extract, clean, and validate structured datasets for exploratory data analysis (EDA) and custom analytical reporting. - Developed interactive Power BI and Tableau dashboards to track operational KPIs, improving visual reporting accuracy and insights delivery timelines. - Collaborated across remote team frameworks to document data workflows, knowledge-sharing repositories, and analytical project methodologies.	
SERVICE ENGINEER – Operations & Technical Support GVR Technolabs Pvt Ltd, Kochi, Kerala	May 2025 - March 2026
- Analyzed operational performance data and technical metrics using spreadsheets and Google Workspace tools to identify system anomalies and support troubleshooting workflows. - Prepared detailed technical service reports and process documentation while collaborating with cross-functional engineering teams to resolve operational issues under tight timelines.	

SKILLS

Technical Skills: Data Analysis, Data Cleaning, Exploratory Data Analysis (EDA), Statistical Analysis, Anomaly Detection, Dashboard Development, KPI Reporting, Business Intelligence.

Tools & Platforms: SQL (MySQL), Python, MS Excel, Google Workspace (Sheets, Docs), Power BI, Tableau, R Language, Git/GitHub, Jupyter Notebook, R Language, C.

PROJECTS

Uber Operations and KPI Monitoring Dashboard	Power BI MS Excel Power Query
- Cleaned and transformed over 100,000 trip records using MS Excel and Power Query, ensuring data integrity and automating KPI tracking workflows. - Engineered an interactive Power BI dashboard featuring dynamic slicers, drill-through reports, and trend analysis to evaluate revenue patterns and customer booking behavior.	
Interactive Airbnb Market Analytics Dashboard	Tableau SQL Data Visualization
- Analyzed 48,000+ Airbnb listings using SQL and statistical summaries to identify market trends, pricing distributions, and occupancy patterns across regions. - Designed interactive Tableau dashboards with geographical mapping, dynamic filter controls, and custom KPI cards to communicate actionable market insights.
